- Consistently receiving outstanding feedback for workshops and livestock production training courses.
- Extensive experience managing large scale projects from the requirements gathering phase to completion.
- Leader in managing diverse teams of professionals through effective and motivating mentoring strategies.

PROFESSIONAL EXPERIENCE

**1. Crest Poultry Group (CFI Holdings)
Group Veterinarian**

April 2010 to date

Core duties include:

- management of all health programs of a 200 000 capacity Broiler Breeder farm, 150 000 capacity Layer unit and 500 000 capacity broiler unit
- Designing and implementation of biosecurity and health monitoring programs for broiler and layer breeders, commercial layers and broiler units in line with Government regulations
- Quality control of all health procedures (vaccinations, deworming, debeaking and application of medication)
- Designing, implementation and Monitoring of HACCP programs for the poultry processing plant and feed mill in line with Government regulations
- Conduction of routine farm visits for disease and production management surveys
- Carrying out staff and poultry farmers training programs on management of poultry from day old to slaughter (broilers) and from day old through egg production (layers)
- Managing the laboratory activities, authenticating and interpretation of all laboratory results and communication to clients.

Accomplishments:

- Training of farmers in broiler production for N.G.Os. (Mavambo, Childline, Simbararshe, Child Protection Services, Howard Mission and Chiedza).
- Production of broiler and layer production manuals and pamphlets.

**2. World Education Inc, Child First Program
(Broiler Projects Consultant)**

May –October 2012

Primary responsibilities included:

- Training of 50 project beneficiary groups (each with minimum of 30 members) on profitable broiler production through WEI partners

- Technical farm visits to the beneficiary groups to do on site audits and production surveys
- Provision of technical advice to the beneficiary groups on all broiler and layer health
- Provision of monthly updates to WEI on progress of the project.

Accomplishments:

- Training of farming syndicates in Karoi, Magunje and Harare

3. Vetco Animal Health (CFI Holdings)
(Laboratory Veterinarian)

June 2009-March 2010

Main duties involved:

- Conducting multi-species post mortems in the laboratory; giving advice to farmers accordingly and following cases to farms for further investigation
- Carrying out quality control (audits) in poultry management procedures
- Poultry farm visits for on-farm disease and management surveys
- Conducting poultry management trainings for broilers and layers.

Accomplishments:

- Production of Broiler production and Poultry Biosecurity manuals for Vetco Animal Health
- Designing and production of disease awareness leaflets for Vetco Animal Health.

4. Central Veterinary Laboratory
(National Veterinary Pathologist)

March 2008- May 2009

Core tasks included:

- Management of pathology section staff and implementation of policies in the section
- Conducting multi species post mortems and giving advice accordingly
- Follow up of cases to farms for conduction of on-farm surveys
- Conduction of routine pig farm audits to ensure that they conform to stipulated government standards and spearheading research in animal pathology.
