2015	R 18.43		

In the two graphs that follow, the TOTAL REALISATION (as presented in the first graph above) is separated into: 'Total realisation of fresh product' and 'Total realisation of frozen product'.

The average realisation price for *frozen* product in the fourth *quarter* (4Q 2018) was R21.39 per kg, an increase of 1.3 % in comparison with the 3Q 2018 and an increase of 1.5 % in comparison with 4Q 2017.

2018	R 21.37	+	4.5	% over 2017
2017	R 20.44	+	15.2	% over 2016
2016	R 17.75	+	0.2	% over 2015
2015	R 17.72			

The year-on-year increase in price in 2017 is put in perspective by the overall annual increase in the producer price between 2015 and 2016. The average increase of only 0.2 %, despite huge drought-related increases in feed prices, suggests the 2017 increase in price was a long overdue correction.
